ASSIGNMENT-2

Build a python code, assume that temperature and humidity values generated with random function to a variable and write a condition to continuously detect alarm in case of high temperature.

Program:

```python
import random

while(True):

    a=random.randint(10,120)

    b=random.randint(10,120)

      if(a>35 and b>60):

       print(" high temperature and humidity of:",a,b,"%
                    alarm is on")

      elif(a<35 and b<60):

       print("Normal temperature and humidity of:",a,b,"%
                    alarm is off")

      break
```

OUTPUT:

```python
1  import random
2  while(True):
3      a=random.randint(10,120)
4      b=random.randint(10,120)
5      if(a>35 and b>60):
6          print(" high temperature and humidity of:",a,b
               ,"% alarm is on")
7      elif(a<35 and b<60):
8          print("Normal temperature and humidity of
                :",a,b,"% alarm is off")
9          break
```

```
high temperature and humidity of: 93 71 % alarm is on
 high temperature and humidity of: 102 114 % alarm is on
Normal temperature and humidity of: 26 16 % alarm is off
>
```

```python
1  import random
2  while(True):
3      a=random.randint(10,120)
4      b=random.randint(10,120)
5      if(a>35 and b>60):
6          print(" high temperature and humidity of:",a,b
               ,"% alarm is on")
7      elif(a<35 and b<60):
8          print("Normal temperature and humidity of
                :",a,b,"% alarm is off")
9          break
```

```
high temperature and humidity of: 70 95 % alarm is on
high temperature and humidity of: 82 108 % alarm is on
 high temperature and humidity of: 62 91 % alarm is on
 high temperature and humidity of: 82 70 % alarm is on
Normal temperature and humidity of: 28 40 % alarm is off
>
```

```python
1  import random
2  while(True):
3      a=random.randint(10,120)
4      b=random.randint(10,120)
5      if(a>35 and b>60):
6          print(" high temperature and humidity of:",a,b
               ,"% alarm is on")
7      elif(a<35 and b<60):
8          print("Normal temperature and humidity of
                :",a,b,"% alarm is off")
9          break
```

```
Normal temperature and humidity of: 32 58 % alarm is off
>
```
